

Use genuine Kyocera toner and **SAVE!**

In all Kyocera laser printers & multi-function devices, the drum is made from hard wearing ceramic & is separate from the toner. For the life of the drum, you will only need to replace the toner – saving you time, money & minimising waste to the environment.

It is important to use genuine Kyocera toners. Tiny ceramic particles embedded in Kyocera's 'Ecotone' toner continually polish and reconditions the drum during normal printing and copying.
